

Consultant Artificial Intelligence (m/w/d)

Join Ten4 Consulting GmbH: A Vanguard in Management Consultancy

Location: Wiesbaden, Germany

Division: ten4 Digital

At Ten4 Consulting GmbH, we're more than just a consultancy; we are the architects of transformation for globally active corporations. Specializing in steering digital transformations, enhancing information security, and facilitating seamless corporate integrations, we're on the lookout for forward-thinking professionals to join our growing team. With over 60 dedicated consultants and a network of top-tier external specialists, we deliver innovative solutions across Cybersecurity and AI.

Opportunities Await:

- **Develop Cutting-edge AI:** Utilize the latest advancements in Large Language Models (LLMs) to create AI assistants that drive sophisticated data analysis and innovative applications.
- **Custom Solutions:** Create unique Proof of Concepts to meet specific client needs and lead the technical evolution from prototype to production.
- **Shape the Future:** Engage in predictive analysis to influence and anticipate industry trends in AI.

Why Choose Ten4?

- **Flexible Employment:** Option between permanent and freelance positions to suit your lifestyle.

Consultant Artificial Intelligence (m/w/d)

...

- **Dynamic and Diverse:** Thrive in a varied work setting with major international clients, fostering a collegial atmosphere with flat hierarchies.
- **Creative Autonomy:** Enjoy the freedom to inject your creativity into diverse and challenging projects.
- **Remote Flexibility:** Benefit from our flexible working arrangements, including comprehensive remote work options.
- **Competitive Compensation:** Receive attractive payment coupled with opportunities for professional and personal growth through our mentoring programs and training budgets.

We're Looking For:

- **Educational Background:** A Master's degree or equivalent in Information Technology, Mathematics, Physics, or a related field.
- **Proven Experience:** A track record of successful AI project execution.
- **Technical Proficiency:** Strong skills in data science, machine learning, NLP, and Python programming. Experience with prompt engineering and developing ChatGPT plug-ins would be advantageous.
- **Language Skills:** Excellent command of both German and English.
- **Ready to Transform the Future?** Apply now and be a part of our dynamic team that is reshaping industries. Submit your application in German or English and let's innovate together!
